TECH SKILLS

Data Engineering & Web Extraction

- Python (Scrapy, BeautifulSoup, lxml, Playwright, Selenium, Requests)
- Pandas, NumPy — data cleaning, validation, deduplication
- Parquet, DuckDB, PostgreSQL — pipeline & storage design

Network & Systems Engineering

- MPLS, Segment-Routing, BGP, OSPF, MSTP, Multicast Technologies & Protocols
- Network Automation & Security
- TDM/SDH/DWDM
- Unix & Linux Platforms

EDUCATION

National University
Bachelor of Commerce, 2004

PROFESSIONAL TRAINING

- Data Ingestion with Python; LinkedIn Learning — 2025
- Python for Data Science & Machine Learning Essential Training Part 1; LinkedIn Learning — 2024
- Web Scraping with Python; LinkedIn Learning — 2024
- Python Data Analysis; LinkedIn Learning — 2025
- Using Python for Automation; LinkedIn Learning — 2024
- Advance IPv6 Routing & Deployment; SANOG XVII — 2011 (SANOG Fellowship)
- IPv6 Routing Workshop; APNIC — 2010
- MPLS Network Design & Deployment; SANOG XV — 2010
- SDH/Ether Access /

PROFILE

20+ years in national and multinational network & systems engineering, now building a specialised freelance practice in Python-based web data extraction, automation, and data engineering — architecting production-grade data pipelines and a live web-extraction framework serving multiple industry verticals.

KEY PROJECTS — CURRENT FREELANCE WORK

Web Data Extraction Framework (Production)

- Native Python (asyncio) extraction and integration platform, live across commercial real estate, architecture/design media, e-commerce, and business-directory verticals
- Anti-bot / blocked-page detection, policy-driven validation and deduplication, structured JSONL/ELT export

Custom Data Pipeline — Real Estate Data Platform (Solo Architect)

- Designed a large-scale ELT-based data pipeline with immutable, tiered storage architecture, built for full data lineage and auditability from raw ingestion through to reporting
- Multi-tenant security design (per-client isolation, two-tier RBAC, mandatory 2FA); hierarchical job/run and analytics lineage IDs
- Property data dictionary spanning 8+ real estate categories, cross-referenced against industry-standard real estate data dictionaries

Portfolio Highlights

- Business Directory Profile & Contact Data Extraction — Multi-Site: 30,000+ deduplication checks; largest run processed 8,633 requests, 8,609 successful, 0 blocked pages
- E-commerce Product Catalog & Image Extraction: 2,989 product records, 2,478 images downloaded, 76 duplicates caught, 0 failures
- Editorial Content & Image Extraction: 300 records processed, 1,442 images downloaded, 410MB delivered

ACHIEVEMENTS

- Plan, Develop & Implement secure routing policy for both IIG & ISP
- Implementation of MANRS compliance for both IIG & ISP (CGL/Link3)
- Development of Network Operational Best Practices & Policies; Technical documentation & SOW development for RFQs for Submarine Cable License, NTTN Services
- Data Centre Expansion & various Core Network Migration Works (both local and foreign); DC/DR solution design & development for SP network; IPv4 & IPv6 Address Planning for both ISP & IIG network; Data Connectivity solution design for various enterprises within the country; namely DHL, HSBC, SCB, UNICEF, Bangladesh Army

EXPERIENCE

Freelance — Data Pipeline & Web Extraction Specialist | Apr 2026 – Present

- Design, build, and maintain production-grade Python web-extraction and data-pipeline systems for clients across multiple industry verticals
- Solo architecture of a large-scale real estate data platform and a live web-extraction framework (see Key Projects), alongside delivered freelance engagements in business-directory, e-commerce, and editorial-content data extraction

Community Trainer (Retained), APNIC | Jul 2023 – Nov 2025

- Conduct Online & Face-to-Face training programs
- Validate existing or new training content & suggest, develop and deliver relevant operational content
- Local & regional engagement for potential training opportunities

Assistant General Manager, NOC, Level3 Carrier Ltd. | Dec 2021 – Jun 2023

- Communication and Co-Ordination with Govt. Regulatory Authorities and all Foreign Service Providers; internal cross-functional co-ordination for technical operations; technical operational policy development; technical solution assessment & governance for Customer Services; Project Works (Submarine Cable License)

Manager, NOC, Link3 Technologies Ltd. | Aug 2005 – Nov 2021

Pseudowire Access; RAD — 2009

- CCNA; CUET — 2003 - 2004

- Network Infrastructure planning, management, analytics & reporting; project works, R&D & in-house training; corporate solution design, development & management

Manager, NOC, Cybergate Ltd. | *Aug 2013 - Nov 2021*

- Network Infrastructure (Local & Foreign) planning, management, analytics & reporting

Instructor, Macrosoft Ltd. (Aptech Computer Centre), Chittagong | *2005*

- Course: System Administration of Sun Solaris 8 — 72 hours. Specifically designed for Bangladesh Navy, covering basic system and network administration & operation.
